

Prof. Ping Xiang
Central South University, China

Dr. Xiang Ping graduated with his PhD from the City University of Hong Kong in 2012. Before his PhD study in City University of Hong Kong in 2009, He had several years' working experience as an engineer in industry taking responsibilities for mechanical analysis and design. He was involved in numerous mechanical analysis of building structures in Hong Kong. His main research interests and technical expertise are in solid mechanics, meshfree methods, multiscale modeling, nonlocal elasticity, bio- and nano-mechanics, computational mathematics, numerical methods in engineering and structural design. Over the last years, his research in these fields has resulted in refereed international journal papers, including *Comput Meth Appl Mech Eng.*, *Int. J. Solids Struct.*, etc. Currently, he is a Professor in Civil Engineering at Central South University.
